OnSite

MODULE DATASHEET · B ONSITE

Operational Performance Measurement

Know how much each person did in which area: work types with quantity units, area QR code, quantity on exit, totals to Excel.

Work types | Area QR code | Quantity | Quantity statement

Who it is for: project manager, site manager, those doing the settlement
What it shows: how work types are built, the worker flow and the quantity statement
Prepared by: B Consulting Kft. · bonsite.hu
Version: 1.0 · 13 October 2026

Quantity from the area

OnSite

Work types per site
In a tree, with an icon and a name, a required time and a quantity label, in Hungarian and English. You can make the quantity mandatory.

Area QR code
The worker scans the area QR code to enter the area, and scanning another area's code automatically exits the previous one.

Quantity on exit
When it is mandatory for the work type, the worker enters the quantity done on exit.

How the work runs

1
Create work types
Per site you create the work types with a quantity unit.

2
Scan the area QR code
The worker starts the work by scanning the area QR code and stops it by scanning the next code.

3
Work type and quantity
On entry the worker picks the work type, on exit enters the quantity done.

4
Quantity statement
You view it by period, site and area, and export it to an Excel file.

Setting up work types

A work type at a site

Structure
tree and order

YOU SET
1. Tree structure: parent and child work types
2. Icon and name
3. The order of the work types

Measurement
time and quantity

YOU SET
1. Required time
2. Quantity mandatory or not
3. Quantity label in Hungarian and English

Copying
several sites

YOU SET
1. You can copy work types from site to site

Work type, quantity, statement

The worker's side

Work type on entry
If the site has work types, the worker picks on entry what they will do.

GPS check, if you want it
An optional GPS check can be switched on for the area, and a suspicious position stays marked.

Own history and status
The worker sees their own history and current status.

Quantity statement

By period, site and area
It totals the quantities done by period, site and area.

Excel export
The statement can be exported to an Excel file for settlement.

Entered quantities
The statement lists the rows for which a quantity was entered.

Who does what

Worker
in the area

- Scans the area QR code
- Picks the work type
- Enters the quantity on exit

Setup person
work types

- Creates work types per site
- Copies them from site to site

Statement viewer
settlement

- Filters quantities by period, site, area
- Exports to Excel

The above is the typical split. Roles are set per function inside the module.

Connection: the Quantity statement is available in the Reports menu, together with the other reports.

See it in action

Request an online demo of the Operational Performance Measurement module, run with your own site processes.
